

# Bartlett Washer / Waxer'

The 'Bartlett Washer/Waxer' has been built for over 50 years and has evolved through experience and new technologies into the very effective machine that we offer today. Built with North American Quality craftsmanship and components, we can custom design a solution that works best for you!

Works great in combination with our advanced drying system that very efficiently cures the wax and is easily adjusted by touch screen to accommodate various varieties needs.

# Options;

# 'Bartlett Washer / Waxter'

## Water Sanitization System

- Water Filter
  - Paper Filter or Sand/Charcoal Filter
- Water Treatment
  - Pulse Instruments automatic chlorination
  - Web monitoring with report that is simply accessible for food safety audits

## Wax Brush Cleaner

Increase the effectiveness of your wax brushes by maintaining their cleanliness and save time at the end of the shift. One touch of a button initiates the automated sequence which takes 30 minutes to complete. The system can be retrofitted onto current machines, or ordered on a new waxter.

- Water bars soak the dirty brushes
  - Warm water can be used
  - Soap/cleaner injector available
- Pneumatic cylinder engages the flicker bars
