

# GeoSort Ultimate Clean

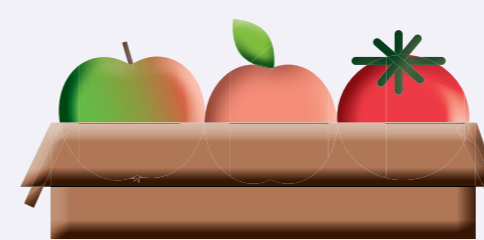

## Avoid and prevent

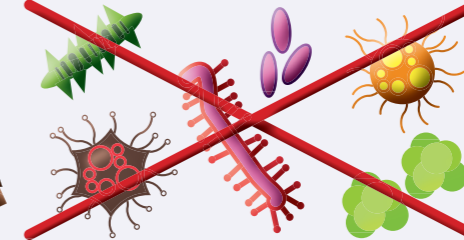

- Avoid build up of dirt
- Avoid chance of bacteria growth
- Blue machine parts for visual detectability
- Option: automatic cleaning of carriers and diabolos
- Open construction
- Easy and effective cleaning
- Stainless steel and plastic parts
- No lubrication chains and no moving parts

GREEFA has a long and proven track record with the renown GeoSort sorting machine.

Suitable for round and delicate fruits. Fruit-friendly treatment guaranteed throughout the sorting process.

The GeoSort Ultimate Clean prevents dirt to stick to the surface. The dirt that does adhere is now clearly visible. And easy to clean.

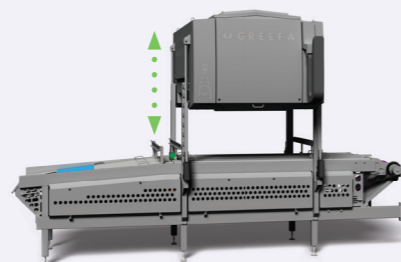

By using and cleaning the machine correctly, you can be sure of food safe fruits.

100% Dutch quality & design · In house innovation & development · Free (remote) support

**Singulator**  
Newly designed diabolos singulate and transport fruits more fruit-friendly. Easy-to-clean design.

**Liftable camera box**  
Four actuators lift the camera box up to 80 cm for thorough cleaning. Cameras are shielded.

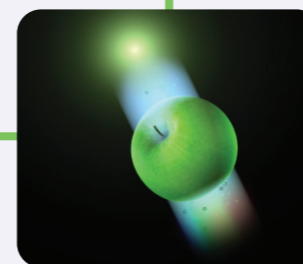

**iQS · External quality**  
Revolutionary vision system analyzes irregularities as big as 1mm<sup>2</sup> on and slightly under the skin.

**Open construction**  
The openings along the side of the machine improve visual inspection.

**Transfer unit**  
The fruit grippers have an open design and can easily be changed. The transfer unit can be tilted 40°.

**iFA · Internal quality**  
Advanced measuring system for internal quality detection: glassiness, internal browning and brix.

**Camera box**  
The iFA camera box is completely waterproof and protects the lamps and data recorder.

**Optional**  
Cleaning unit for automatic cleaning of diabolos and fruit carriers. You also need a mixing unit for cleaning agent and disinfectant.

**Up to 50 outlets**  
Every outlet consists of a slide plate and discharge belt entirely redesigned with hygienic front and center.
